

 MOS:1.77 Judge rating:2.79	Evidence: Severe underexposure, resulting in a very dark scene, the foreground and background are lost in shadow, obscuring details. Solution: Increase exposure to brighten the dark areas and recover details while preserving the tower.	 Judge rating:2.84	Evidence: Low visibility and lack of detail, around the central illuminated structure Solution: Taking a clearer shot in brighter conditions would enhance quality. Stabilizing the focusing on the lit structures could yield better.	 Judge rating:4.86
 MOS:3.38 Judge rating:3.86	Evidence: Significant noise and grain due to high ISO in low-light conditions. Solution: Apply a denoising filter to reduce the visible grain while preserving edge details, improve the visibility of textures on the dog's fur and the wooden planks.	 Judge rating:3.17	Evidence: Low resolution, motion blur poor lighting around the dog's face and background details Solution: Brighter light would enhance quality. Cropping to remove peripheral elements like the foot would improve composition.	 Judge rating:4.97
 MOS:3.63 Judge rating:4.15	Evidence: Significant noise and grain, particularly in the dark background. Solution: Apply a denoising filter to reduce grain while preserving edge details, followed by a slight sharpening pass to enhance texture.	 Judge rating:3.15	Evidence: Blurred petals and low contrast in the central flower region. Solution: Taking a clearer shot in brighter light would enhance quality. Adjusting focus could sharpen the flowers.	 Judge rating:5.00
